

inSupply Health is an independent supply chain advisory firm, affiliated with JSI Research & Training Institute, Inc., based in East Africa that provides our clients with customized guidance on supply chain management and design.

Developing supply chain maturity strategies

Building organizational capacity for supply chains

We Specialize In

Designing and implementing data-driven, optimized supply chain systems

Forecasting health commodity needs

Our Results

inSupply's signature IMPACT Team approach for structured supply chain problem solving, action planning, and data use helps health workers build a culture of data use and continuous improvement.

In **Kenya**, we found improved cold chain equipment performance in counties after they implemented IMPACT teams with a technology solution as compared to the technology solution alone.

THE TIME VACCINES SPENT IN THE CORRECT TEMPERATURE RANGE INCREASED FROM 84% TO 91% FROM BASELINE TO THE INTERVENTION PERIOD

In **Tanzania**, the inSupply-developed Vaccine Information Management System (VIMS) helps program managers to see country wide data integrated across supply chain logistics and immunization services to better inform decision making through data visibility at all levels.

VIMS REPORTING RATES INCREASED FROM 78% IN APRIL 2018 TO 99% IN AUGUST 2018
